

NEWTON

ACCELERATES YOUR BUSINESS

CASH & TRANSACTION MANAGEMENT

MULTI-LAYER

MULTI-LANGUAGE

MULTI-VENDOR

Newton CTM manages all the flows in the cash-in/out devices of a bank. It guarantees maximum cash points efficiency, and channels functionality for ATMs inside and outside the branch.

Part the Newton application family for integrated banking automation, Newton CTM optimises cash flow operations.

REAL TIME DASHBOARD

Newton CTM gives a single view on cash movements and balances for all devices: ATMs cash-in/out, cash-retails and other self-service counting/deposit devices. Cash points and their related orders can be monitored and managed in an integrated environment.

ORDER PROCESSING SYSTEM

Customisation features are key for top cash points performances: Newton CTM is adaptable to bank rules, it rationalises cash levels and optimises cash transportation logistics reducing idle money and transit costs. Orders are generated automatically in accordance to user settings, with a level of definition of 24 hours.

NEWTON CTM

WORKFLOW

WORKFLOW MANAGEMENT

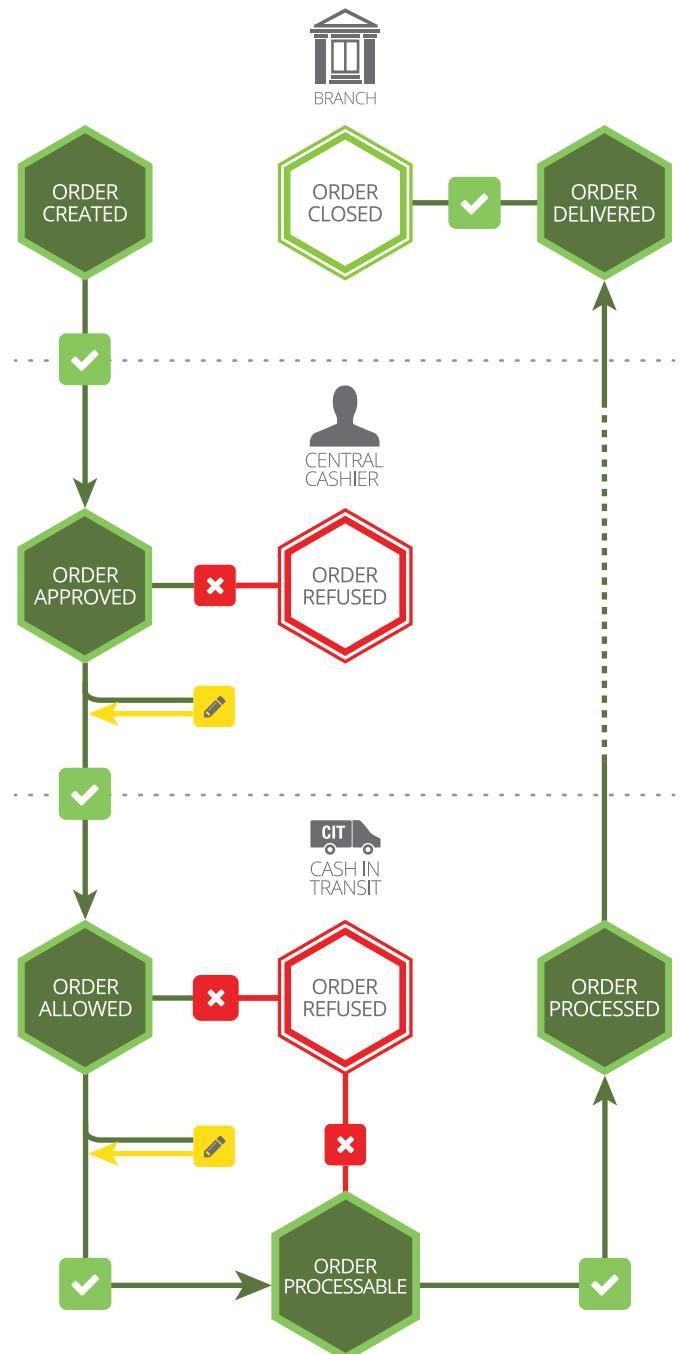

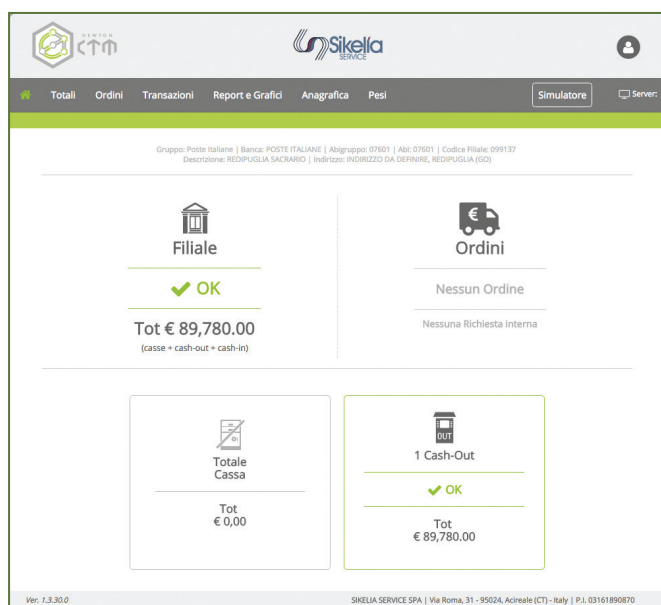

Newton CTM can be accessed by different custom designed company profiles either at operative or supervisory level, for branches, central cash inspectorate, CIT, and automatic and/or manual authorization level.

This enables real time decisions within each single step of the workflow.

FORECASTING

Decision on cash availability predictions are supported by an adaptive algorithm, certified by the Università degli studi di Palermo (Italy), which is also its Institutional Warrant.

Multiple-sourced data are gathered, and processed into estimations that facilitate the planning activity of cash managers, and grant maximum availability to the end-customers.
